

DIGITAL VIDEO RECORDING & INSPECTION SYSTEMS

ADVANCED LEVEL DVR

The Edge Pro DVR is a complete digital video inspection system

Developed for use by personnel with all levels of experience when completing subsea visual inspections, which require real-time event logging

The Edge Pro DVR unit includes:

- Standard definition, high definition or 4K digital video recording (2 x 10TB storage). Various formats, 720i, 1080p, 2160p etc.
- Automatic Blackbox video recording (10TB storage).
- Digital overlay c/w variable transparent logos and fields.
- Full HD video stills and video clips.
- Automatic generation of dive, photo, video and anomaly logs.

The Edge Pro DVR is available as a 3U or 4U rack-mounted unit with 3 removable 10TB hard drives, which store the survey video and photos. The Windows operating system is stored on a solid state hard drive for increased speed and reliability, with a second solid state hard drive for redundancy.

The Edge Pro DVR system has inbuilt automatic data backup using proprietary data file management. A copy of all data from the inspection is stored on 2 removable 10TB hard drives. The third removable drive is used to store SD/HD Blackbox video and can also be integrated with industry standard asset management integrity software.

The EdgeDVR system is configurable to suit your input and output requirements, please contact us for more information.

4 channel recording

Online video clips & photos

3 hardware models — SD, HD & 4K

Automatic dive, photo, video & anomaly logs

User configurable eventing

4 serial inputs

4 channel digital overlay

Configurable to record HDMI input

Suite of applications to aid editing & eventing

Offline eventing

Import/export workpack

Task based inspection workpack

Built-in blackbox recording

Local network video streaming

Network viewer

Client viewer

ABOUT DIGITAL EDGE SUBSEA

Digital Edge Subsea supplies the oil and gas, renewables and decommissioning industries with our digital video inspection system, the EdgeDVR.

Digital Edge Subsea started trading in 2010 with our single channel SD digital video recorder and inspection system. The EdgeDVR is designed to be simple to use for all personnel. The system is engineered to be reliable, with the highest level of support. All systems can be remotely accessed for training and technical issues.

Digital Edge Subsea produces a range of products and supplies systems to many of the major offshore operators worldwide. Digital Edge Subsea offers worldwide 24/7 technical support for all its systems. With over 1000 systems in use offshore, we have a proven record of reliability.

We are located near to multiple subsea technology companies who supply everything from ROV tooling and equipment to subsea sonars, cameras and connectors.

EDGEDVR 2U INSPECTION SYSTEM

Specifically for local network IP camera recording as a 2U rack-mounted unit with 3 removable 8TB solid state drives, including 6 high-speed ethernet ports for all common video formats.

EDGEDVR LAPTOP

A portable solution perfect for situations where mobility is valuable. The 17" laptop has the same capabilities as the 3U/4U rack-mounted system and 4 channel HD recording capability.

EDGEDVR WORKSTATION UNIT

The mobile EdgeDVR Workstation with triple 17" monitors brings you the power of a 3U/4U EdgeDVR unit but in a portable form factor.
